3. How to succeed in this course?	. 2
3. Quick directions	. 2
4. If you need help	. 2
The end	. 2

last modified: 2017-09-18

#### 1. Welcome!

I am Clement Levallois, Associate Professor at em lyon business school

Also head of the Data R&D Institute, launched this Summer with colleagues:

My research interests:

- Recent history science (behavioral sciences)
- Gephi software and network visualizations
- Applications to data mining on social networks (using Twitter data and Java programming)

#### 2. What this course is for

- For business students, bring them a culture of data and related technologies.
- For engineering students, bring them a **culture** of how tech is applied in a business context

The goal is not to turn you into data scientists - we now have plenty of courses for that!

→ Check http://data.em-lyon.com in the "Teaching" section

Rather, the goal is to give you a broad view of **all** these specific topics - so that you understand what they are and you **can join companies where they are central**.

#### 3. How to succeed in this course?

(succeeding = how to get a good grade and how to get a job thanks to this course)

#### Follow the instructions

- · Have you read the syllabus?
- Have you taken the quiz mentioned in the email? (response rate: 31/82 yesterday evening)
- a. read the lectures every week. Pay attention and learn the new vocabulary used.
- b. read the "essential readings"
- c. do the weekly quizzes
- d. come on time and be sharp in class for the speakers
- e. don't neglect the group project start working on it now.

## 3. Quick directions

Brighspace is where you should look for the info. It will point you to:

- Weekly quizzes (also on Brightspace)
- Weekly lectures hosted on https://seinecle.github.io/mk99/
- · Weekly essential readings hosted on Pinterest
- Group project: described on Brightspace

# 4. If you need help

Use the office hours

• I am available every Tuesday morning after class, and at other times by appointment

### The end
